# Bio

A

A dynamic and ambitious architect with large experience in various projects and constructions on luxury houses, home units, industrial and commercial buildings, urban design, heritage and conservation, defense-listed sites and Interior Design.

Since graduating from Minia University, Faculty of Fine Arts with a very good Grade, I have worked in several well-known architecture and design companies.

I possess impeccable technical and computer skills with advanced knowledge of Auto CAD, Microsoft Office, Adobe and other graphics communication programs. In previous jobs I have often been called upon to train juniors and other employees in various computer software.

An excellent working knowledge of contracts administration is also one of my strong points.

My attention to detail and excellent problem-solving skills ensure that every project I work on is done accurately and to the highest possible standard. I am comfortable working as part of a team but also have the ability to take an authoritative role when the situation arises.

My verbal communication skills and positive attitude make me an effective communicator with all clients I work with.

My enclosed resume clearly demonstrates my interest in sustainability and the way in which my skills and experiences are compatible with this role

*Amgad Sabry*
